MATHEMATICS OF THE USSR – SBORNIK

МАТЕМАТИЧЕСКИЙ СБОРНИК

Tom 80 (122) Nos. 1–4, 1969

Volume 9, Numbers 1–4 September–December, 1969 Pages 1–572

INDEX OF AUTHORS

Aminov, Ju. A. *Sources of curvature of a vector field* 199

Aranson, S. H. *Trajectories on nonorientable two-dimensional manifolds* 297

Berkovič, Ja. G. et al., *Letters to the editor* 569

Bočkarev, S. V. *On the coefficients of Fourier series with respect to the Haar system* 93

Burgin, M. S. *Some properties of generalized free products and the imbedding of amalgams of groups* 155

Calenko, M. Š. *Functors between structured categories* 497

Černavskiĭ, A. V. *Piecewise linear approximations of embeddings of cells and spheres in codimensions higher than two* 321

Dem′janenko, V. A. *On the representation of numbers by binary biquadratic forms* 415

Dragilev, M. M. *On special dimensions defined on some classes of Köthe spaces* 213

Filippov, V. V. *Quotient spaces and multiplicity of a base* 487

Fomenko, V. T. *On infinitesimal deformations of convex surfaces with a boundary condition of generalized translation* 151

Grušin, V. V. See Višik, M. I. and Grušin, V. V.

Halfina, A. M. *The limiting equivalence of the canonical and grand canonical ensembles (low density case)* 1

Il′jašenko, Ju. S. *An example of equations* $dw/dz = P_n(z, w)/Q_n(z, w)$ *having a countable number of limit cycles and arbitrarily large Petrovskiĭ-Landis genus* 365

Iohvidov, I. S. *On Hankel matrices and forms* 229

Jakobson, M. V. *On the problem of classification of polynomial endomorphisms of the plane* 345

Korobeĭnik, Ju. F. *The existence of an analytic solution of an infinite order differential equation and the nature of its domain of analyticity* 53

Krylov, N. V. *On a class of nonlinear equations in a space of measurable functions* 241

Leont′ev, A. F. *On the representation of analytic functions by Dirichlet series* 111

Levin, A. L. *The distribution of poles of rational functions of best approximation and related questions* 267

Margulis, G. A. *Discrete subgroups of real semisimple Lie groups* 555

Miheeva, E. A. *On the behavior of solutions of elliptic equations of second order in the neighborhood of a singular boundary point* 467

Miščenko, A. S. *Bordisms with the action of the group* Z_p *and fixed points* 291

Oniščik, A. L. *Decompositions of reductive Lie groups* 515

Ošman, E. V. *On the continuity of metric projection in Banach space* 171

Rabinovič, V. S. *Pseudodifferential equations in unbounded regions with conical structure at infinity* 73

Roze, S. N. *On the spectrum of an elliptic operator of second order* 183

Skornjakov, L. A. *Characterization of the category of polygons* 455

Smoljanov, O. G. *Almost closed linear subspaces of strict inductive limits of sequences of Fréchet spaces* 479

Tihomirov, V. M. *Best methods of approximation and interpolation of differentiable functions in the space* $C_{[-1,1]}$ 275

Tolstov, G. P. *On the Radon-Nikodým theorem* 315

Vaĭnberg, Ju. R. *Algebraic varieties over fields with differentiation* 389

Varšavskiĭ, A. D. *A function algebra of the second degree on nonlocalness* 253

Višik, M. I. and Grušin, V. V. *Boundary value problems for elliptic equations degenerate on the boundary of a domain* 423

Žitomirskiĭ, Ja. I. *On differential operators of infinite order in spaces of type S* 379
